2021 Program Investments

A Letter from Our President

Dear Generous and Loyal Donors,

Thanks to you, PSDI had a record year in 2021! We continue our strong momentum in increasing donors and total donations and, most importantly, greatly increasing the funds sent to help the poor in Bangladesh. Over the past two years our net funds to PEP, our partner in Bangladesh who works directly with the poor, have increased by 56%. At the same time, we have been able to reduce our expenses which allows even more of your funds to make a difference in the lives of those in extreme poverty and enable them to get on the road to self-sufficiency. We are pleased to share the information in our annual report. Please feel free to write or call me directly if you have any questions.

I hope you find our progress encouraging and gratifying and that we can count on your continued support. This year our goal is to increase our funding to PEP by \$50,000. That will put us over the \$300,000 mark for the first time ever. With your help, we can do it!

God bless you all.

Bob Scanlon
